

Made for riders, by riders

A close-up photograph of a rider wearing a silver Arai helmet. The helmet's visor is clear, and the ProShade System is visible as a dark, curved attachment on the top of the helmet. The rider is wearing a dark jacket and gloves, and the background is a blurred green field.

PRO SHADE SYSTEM

Enhance any Arai helmet for any ride.

Provides shade and anti glare in addition to acting as Brings Comfort To Everyday Commutes

When in the raised position the shade acts like a peak, working to improve and streamline the aerodynamic turbulence that can be caused by large touring fairings, reducing buffeting and wind noise. When raised the shade also provides excellent anti glare when riding towards the sun. When lowered the shade greatly reduces the amount of light that enters the eye port. The Pro Shade System is designed to raise quickly whenever needed, when entering a dark tunnel for example, so as to offer increased visibility in unexpected low light conditions. Multiple riders benefits without sacrificing protection or compromising the helmets internal design.

Mounted to the MAX-V shield, provided with a clear Pinlock Anti-Fog lens insert, the new Pro Shade System provides an incredible field of view.

Working to regulate turbulent airflow, in the forehead area, up and over the helmet.

A rider on a BMW motorcycle is shown from a low angle, looking up at the handlebars and the raised Pro Shade System on the helmet. White arrows indicate the airflow being regulated by the shade. The BMW logo is visible on the front fairing.

PRO SHADE SYSTEM

Enhance any Arai helmet for any ride

a peak.

And Long Touring Rides.

**CONVERTS
IN
SECONDS!**

**PEAK
configuration**

In this configuration, the peak reduces sun glare. And the intelligent lock system prevents the shade from dropping unexpectedly from wind pressure.

Functions as a peak

Functions as a smoke shade

**SMOKE SHIELD
configuration**

The Pro Shade System reduces the amount of light that comes into the eye port, but is designed to raise quickly should light conditions darken unexpectedly.

**TO
RAISE
SHADE**

Easily lifted at the center with your thumb, then locked by pushing back to secure both pivot points.

**TO
LOWER
SHADE**

Simply pull shade forward at center to disengage locks at both pivot points, and lower shade.

The Pro Shade System lens is designed to breakaway in an impact when raised.

RX-7 GP

QUANTUM-ST

REBEL

CHASER-V

AXCES II

Fits all Arai helmets with SAI type shield system.

Pro Shade System comes complete and ready to install.

Why limit yourself and choose a helmet with only some of these benefits, when you can add the Pro Shade System to any Arai Helmet of your choice. And, get additional benefits you didn't even realize you needed - until now!
