# Automated Goggle Roll-Off System

## The Ripper

The wireless main unit replaces the need to take your hand off the handlebar to reach up and pull the cord on the roll-off system. Not only is this safer, but faster, and means you're free to clear your vision whenever you NEED to!

## Wireless Handlebar Remote

The remote sits conveniently next to your grip, allowing easy access to press the button.

## Rapid Visibility

With a tap of the button, the arm pulls the cord in a rapid-fire motion, clearing vision in less than 1 second\*

## Keep Your Hand on the Bar

With the Ripper you no longer need to take your hand off the the handlebar to clear your vision!

## Mount to strap

Feed the strap through the strap mounts, then slide the Ripper forward until it touches the back of the roll-off canister.

## Hook Pull Arm

Pull out the pull-cord and hook the Ripper pull arm over the cord.

## Set Mode

Turn on the unit then quick press the sync button to change between Auto-Burst or Momentary Continuous mode.

## Mount Remote

Place wireless remote button in desired location, then screw back mount and tighten down.

## Manual Override

The pull cord is still operational even when The Ripper is attached.

## Sync Multiple Remotes

Sync the Ripper to multiple Wireless Remotes for multiple bike setups. Extra buttons available

## Universal Mount

Universal goggle strap mount works with your favorite goggle roll-off system\*.

## Modes

### Auto-Burst

Press Remote button to activate the Ripper for approx. 1.5 seconds. Use this mode to clear vision automatically with a tap of the button.

### Momentary / Continuous

Press & HOLD Remote button to activate the Ripper for desired time (up to 5 seconds). Use this mode to have more control of roll usage.

### Rechargeable

The Ripper will typically last up to 10 rolls before needing to be recharged via the micro-USB port on the main unit. Battery level is indicated by the 3 LEDs

# What's Included
