

# MIRROR STEM MOUNT

# MIRROR STEM MOUNT

The New Mirror Stem Mount provides optimal phone positioning with an angled arm for left or right side mounting, tool-free adjustments via a gimbal head, and a more secure anti-theft design.

## QLM-MSM

- Gimbal pivot head adjustment via a thumbscrew without the use of tools
- Diecast Aluminium offset arm
- Mount hole size to suit an M10 or M8 thread
- Mounting on left hand or right hand side of the scooter/motorbike

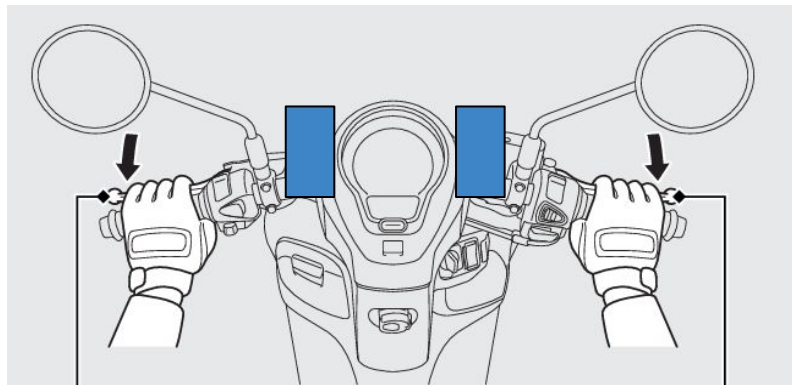

## QLM-ADAPTORS

- Raise the Mirror shaft interface by 20 mm away from surrounding trim & components
- High tensile Grade 8.8 Steel
- Kit accommodates M10 x 1.25, M10 x 1.25-LH, M10 x 1.5, M8 x 1.25

**Launched:** June 25 2024

# QL MOUNT - WHERE?

- The Mirror Stem Mount is sandwiched between the mirror shaft and the mirror shaft mount interface
- The Mirror Stem Mount can be assembled on the left hand or right hand side of the motorcycle
- The Motorcycle mount interface can vary significantly with trim profile, position of handlebar controls and surrounding components such as the clutch and brake reservoir
- Adding an adapter will raise the mount interface to provide clearance to surrounding components and trim.
- QL Accessory (sold separately) - 'Mirror Stem Mount Adapter Kit' will broaden the Mirror Stem Mount fitment range on motorcycles and scooters with difficult mount interfaces

# TYPES OF BIKES

### 1. Model

Yamaha XMax 125

### 2. Model

Honda Italia SH150

### 3. Model

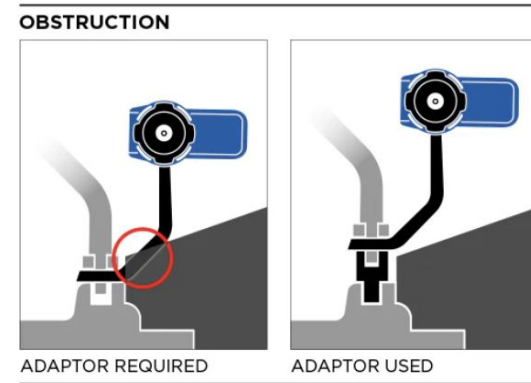

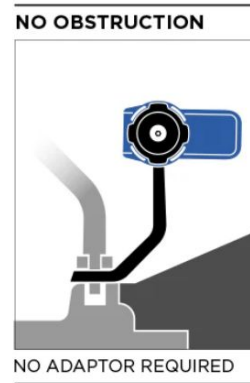

Vespa GTS 300 RST22

# WHEN TO USE ADAPTORS

**The majority of the scooter stem interface is recessed below the fairing and requires an adaptor to raise the height of the mirror interface**

- Mirror adapters come as standard on scooters & motorbikes
- They are a top selling accessory around the world
- 60% of scooters reviewed require a longer adapter than the factory fitted adapter to provide clearance for the required orientation of the stem plate & arm

## Mirror Stem Mount Adaptor Kit

Raise the Mirror Stem Mount 20mm for additional clearance to surrounding components and trim. Required if your mirror attaches below scooter fairings or surrounding components interfere with installation.

# KEY MESSAGES / COPY

The Quad Lock® Mirror Stem Mount securely installs between the mirror stem shaft and your scooter or motorcycle's interface.

## OPTIMAL VIEWING ANGLE

The offset, angled arm allows for clearance to components and trim in various installation setups on the left or right hand side of your scooter or motorcycle. Make finer adjustments to your phone's viewing angle with the gimbal pivot head - no tools required.

## SECURE MOUNTING

The Quad Lock® Mirror Stem Mount securely installs between the mirror shaft and scooter or motorcycle interface. The gimbal head features an anti-theft design to prevent disassembly.

## SLEEK DESIGN

Designed to complement your bike's aesthetics, the Quad Lock® Mirror Stem Mount features a minimalistic and robust design that integrates seamlessly with your scooter or motorcycle.
